National Practitioner Data Bank Public Use Data File

NPDB Public Use Data File contains selected variables from National Practitioner Data Bank Reports, received from September 1, 1990 through September 30, 2020.

The NPDB Public Use Data Files are available for download in the following three formats from https://www.npdb.hrsa.gov/resources/publicData.jsp:

1) NPDB2007.POR [SPSS portable data file]

- The SPSS [Statistical Package for the Social Sciences] version of the Public-Use File is in the "portable" format and can be read directly by SPSS regardless of the computer's operating system.
- If you can use the SPSS "portable" data file, we strongly recommend that you do so to retain the variable names and labels saved in the file. With the ".POR" file therefore, you can avoid having to manually format the data.
- A fully functional demo version of SPSS can be downloaded from http://www.spss.com/ for a limited time.
- The ".POR" file can be read by a variety of other statistical packages as well.

2) NPDB2007.DAT [ASCII text]

3) NPDB2007.CSV [Comma Separated Values]

The CSV file may be too large to be opened in most spreadsheet programs such as EXCEL or QUATTRO PRO.

Each of these files has the following:

Number of Cases: 1,543,783
Number of Variables: 54

As a result of the HIPDB merger on May 6, 2013, the NPDB Public Use File includes records from Section 1921(a)(1)(A) and 1921(a)(1)(B) with the exception of Judgment or Conviction Records (JOCRs).

CAUTION: Because of the size of this file, we strongly recommend that analysis be performed using statistical software such as SPSS, SAS, etc. The file may be too large to import into most spreadsheet programs, such as EXCEL or QUATTRO PRO. Although spreadsheet or database programs may be used to create tables and count records with specific characteristics, the use of these programs with this file is likely to be a slow and cumbersome process. Word processing programs cannot be used to analyze this file.

UNLESS YOU USE STATISTICAL SOFTWARE WHICH RECOGNIZES THE SPSS ".POR" FORMAT, YOU MUST USE THE ".DAT" OR ".CSV" VERSION OF THE PUBLIC USE FILE AND DEFINE VARIABLES AND VALUES USING THE FORMAT INFORMATION BELOW. Statistical software which recognizes the SPSS ".POR" format can read all of the variable and value information automatically and will not require you to define variables and values.

*NOTICE OF CHANGE IN MEANING OF CODE. Effective with the September 30, 2007 data file, Adverse Action

Classification Code 1146 was reassigned to "Voluntary Limitation or Restriction on License". In earlier data files, code 1146 was used for "Reprimand, Censure, Voluntary Surrender of License (Individual) (Legacy Reports Only)." Code 1144 is now used for this category.

BEGINNING WITH FILES DATED DECEMBER 31, 2005 AND LATER, four new field of license codes (codes 148, 165, 175, and 470) have been added for the LICNFELD variable and the description of LICNFELD in this documentation was updated to reflect the additions. Users should be cautious in interpreting results involving the new codes. Although these codes were first available to reporters on October 17, 2005, for this data file any previously filed reports which included a written in "other, specify" response that fit one of the newly available codes was coded to the new code in this file. However, reports which may actually involve a practitioner in a field with newly available code but which were actually reported using an old code could not be recoded to the new code. For example, a Certified Nurse Aide (new code 148) that was previously reported as a Nurse Aide (code 150) was not recoded to 148 since we have no way to tell from the record that the practitioner was actually a certified nurse aide. But if the individual was previously reported with "Certified Nurse Aide" written in the "other, specify" field, then the report was recoded to 148.

>>>> IMPORTANT NOTICE TO USERS OF FILES DATED MARCH 31, 2004 OR LATER WHO USED EARLIER VERSIONS OF THE NPDB PUBLIC USE FILE <<<<

The March 31, 2004 and later versions of the Public Use File are substantially different from previous versions in both content and format. New variables have been added concerning malpractice payments. Some old variables have been dropped and old values converted to values for the new variables. Some variables have been renamed. These changes reflect modifications to the NPDB's malpractice payment reporting requirements effective January 31, 2004. Specifically, AGEGROUP has been re-named PRACTAGE; ALGNNATR, ALEGATN1 and ALEGATN2 have replaced MALCODE1 and MALCODE2; OUTCOME has been added; TOTALPMT has been added to represent all past and expected future payments for the reported practitioner for this particular incident. PAYMENT is retained. It represents, as it has in the past, the amount of the reported payment, which in most cases is the total payment. In addition, payment amount groupings have been changed for larger payments for the "PAYMENT" variable. These new groupings also apply to the new "TOTALPMT" variable. PYRRLTNS, which explains the relationship of the reporting entity to the reported practitioner, PTAGE, the age of the allegedly injured patient in 10 year increments, PTGENDER, and PTTYPE, inpatient, outpatient, or both, have been added. Only records reported on or after January 31, 2004 in the new reporting format include values for the new variables except ALGNNATR, ALEGATN1 and ALEGATN2. For older records these three variables have values translated from the previous MALCODE1 and MALCODE2 variables. The EXCLTYPE, EXCLSTAT, and EXCLYEAR variables have been deleted because all legacy format Exclusion records have been converted to new format Adverse Action records. The information previously found in these three variables is now found in the analogous variable in exclusion Adverse Action records. The RECTYPE variable was also changed to accommodate the new malpractice payment report type. Detailed information is provided below in the "Detailed Variable Information" section.

BEGINNING WITH FILES DATED DECEMBER 31, 2003 AND LATER, this documentation file changed. The code list for the REPTYPE variable was updated.

BEGINNING WITH FILES DATED JUNE 30, 2003 AND LATER, this documentation file changed. The code lists for the following variables were updated: LICNFELD, MALCODE1, AACLASS1, BASISCD1, and TYPE. New date of first use and date of last use columns also have been added to the description of the values for some variables. The date of first use and date of last use columns indicate the dates that the values were offered as selection criteria for report submission. When no date of first use is provided, the

value has always been available. When no date of last use is provided, the value is currently available. The format for the data file was not changed.

BEGINNING WITH FILES DATED SEPTEMBER 30, 2002 AND LATER, the format of the data file changed. The adverse action classification variable name (AACLASS) was changed to "AACLASS1" and four additional adverse action classification variables (AACLASS2, AACLASS3, AACLASS4, and AACLASS5) were included in the file. Therefore each record may have up to five adverse action classification codes.

BEGINNING WITH FILES DATED APRIL 30, 2002 AND LATER, the format of the data file changed. The basis for action variable name (BASISCD) was changed to "BASISCD1" and four additional basis for action variables (BASISCD2, BASISCD3, BASISCD4, and BASISCD5) were included in the file. Therefore each record may have up to five basis for action codes.

BEGINNING WITH FILES DATED DECEMBER 31, 1999 AND LATER, the format of the data file changed. Records of exclusions from participation in Medicare and Medicaid (individuals only, not organizations) were added to the file and variables concerning exclusions were added. Beginning with the file of December 31, 1999, the payment amount variable also was changed. Ranges of payment amounts have been established and all payments within a range are coded to the midpoint of the range. In addition, beginning with the file of December 31, 1999, the variables included for adverse action records were changed. Files dated December 31, 1999, and later also contain revised variables for counts of the number of reports of various types for each practitioner. See the descriptions of the variables below for details concerning the new or changed variables.

BEGINNING WITH FILES DATED SEPTEMBER 30, 1999 AND LATER, the former "PROCYR" (year current version of the record was processed into the NPDB) variable was changed to "ORIGYEAR" (year original version of the report was processed into the NPDB). This variable does not change if a report is corrected or modified in a later year. The "TYPE" variable also replaced "ENTYTPDB" in the September 30, 1999 and later files. This reflects a change in entity type codes introduced during the summer of 1999. As reporting entities re-register with the NPDB, the type codes shown in this file will increasingly reflect use of the new codes; however since some reports included in this file were reported by entities which no longer exist or are no longer registered, some reports may permanently use the old entity type codes. See the explanation of "type" below.

BEGINNING WITH FILES DATED APRIL 30, 1999 AND LATER, each record contained the variable "FUNDPYMT," which identifies malpractice payments made by State Patient Compensation Funds. In most cases these payments are in addition to payments made for the same practitioner for the same incident by a primary insurer.

IT IS NOT CORRECT TO CITE THE NATIONAL PRACTITIONER DATA BANK AS THE SOURCE WITHOUT ALSO SPECIFYING THE PUBLIC USE DATA FILE.

Summary:

The Health Care Quality Improvement Act of 1986 (HCQIA), as amended, Title IV of Public Law 99-660, led to the establishment of the National Practitioner Data Bank (NPDB). Title IV authorized the NPDB to collect and disclose to authorized queriers certain information relating to the professional competence and conduct of physicians, dentists, and other health care practitioners. Subsequent laws later expanded the information collected and disclosed by the NPDB and modified its operations. Most recently, Congress passed Section 6403 of the Patient Protection and Affordable Care Act of 2010, Public Law 111-148 to eliminate duplication between the NPDB and the Healthcare Integrity and Protection Data Bank (HIPDB). On May 6, 2013, NPDB operations were consolidated with those of the former HIPDB. As a result of this consolidation, information previously collected and disclosed by the HIPDB is now collected and disclosed by the NPDB. This legislation established the NPDB as the single Data Bank to receive and disclose information collected under Title IV, Section 1921 of the Social Security Act, and Section 1128E of the Social Security Act. Information is available to eligible entities based on the requirements of each law. As of May 6, 2013, the NPDB Public Use Data File contains reports received by the NPDB concerning health care practitioners, entities, providers and suppliers. Reports in the NPDB Public Use File include medical malpractice payments, and adverse actions, including clinical privileges actions, Federal and state licensure and certification actions, professional society membership actions, peer review organization actions, private accreditation actions, exclusions from Federal or state health care programs, and other adjudicated actions or decisions.

Information reported to the NPDB is confidential and can be provided only to authorized queriers, based on their eligibility to receive the information under each of the three laws. Authorized queriers include hospitals, other health care entities with formal peer review, professional societies with formal peer review, quality improvement organizations, health plans, state licensing and certification authorities, Federal licensing and certification agencies, state law enforcement agencies, state agencies administering State health care programs, state Medicaid Fraud Units, agencies or contractors administering Federal health care programs, U.S. Comptroller General, Federal law enforcement agencies and officials, health care practitioners (self-query), and plaintiff's attorney/pro se plaintiffs (under limited circumstances),.

Under section 426 of the HCQIA(42 USC 11135), as implemented by regulations at 45 CFR part 60.13(a)(2)(ix), data may be released to "a person or entity who requests information in a form which does not permit the identification of any particular health care entity, physician, dentist, or other health care practitioner." This file is released in accordance with that provision to facilitate research use of NPDB information by persons interested in medical malpractice, licensing, discipline, and quality assurance issues.

For specific detailed information on the NPDB and the types of data reported to it, you may review the NPDB Guidebook. The Guidebook is available on the Internet at https://www.npdb.hrsa.gov/resources/aboutGuidebooks.jsp. Other information concerning the NPDB is available at https://www.npdb.hrsa.gov.

In accordance with the Law and Regulations, variables which identify or would allow identification of

individual entities or practitioners are excluded from the public use file. In order to assure confidentiality to all types of practitioners, the smallest geographic unit identified in each record in this file is a State. However, *if workloads permit*, the Division of Practitioner Data Bank *may* be able to provide data sets for particular types of practitioners identified to smaller geographic units to researchers who demonstrate to the satisfaction of the Branch that there are enough practitioners of the subject type in each geographic unit for which they desire data (and also in any remaining area in a State for which they are not requesting data) to preclude identification of individual practitioners. Normally geographical units will have to contain at least several counties. Researchers who request such data sets are also responsible for identifying geographical units by ZIP code and for paying the costs of providing the special data set.

The NPDB Public Use Data File contains one record for each report in the NPDB, as a result of the HIPDB merger on May 6, 2013, the NPDB Public Use File includes all NPDB reports from Section 1921(a)(1)(A) and 1921(a)(1)(B) with the exception of Judgment or Conviction Reports (JOCRs), as specified at the beginning of this "read.me" file.

Detailed Variable Information:

Some variables and response categories have been changed over time. Where changes have been made, the variable or value descriptions include "date of first use" and "date of last use." For example, the field of license (LICNFELD) category "Art/Recreation Therapist" was first made available for use by reporting entities on November 22, 1999. Such practitioners previously would have been reported using another field of license category. If no "Date of Last Use" is specified, the category is still in use. Researchers should take the date of first use or last use of a value into account in interpreting analysis results. If no dates are specified, the variable and values are applicable to all records.

SEQNO

Record Number. SEQNO is a unique number assigned to each record. The assigned numbers are not necessarily continuous or sequential. In addition, the SEQNO assigned to any particular record may not be the same in different editions of the Public Use File.

RECTYPE

Record Type. RECTYPE is the form of Report submitted to the NPDB. Possible values include: Malpractice Payment (old reporting format), Malpractice Payment (new reporting format), Adverse Action (old reporting format), or Adverse Action (new consolidated adverse action "CAAR" format). Note that in this file some variables from type "M" malpractice payment reports and some variables from type "A" adverse action records have been translated into the codes currently used in the new type "P" and type "C" records. This was done to facilitate analysis. These translations are not in the records disclosed in response to queriers submitted to the NDPB by to authorized querying entities. Queriers receive full copies of reports as submitted.

ORIGYEAR

Year this record (or, if the record was later corrected or changed, the year the original version of this record) was processed into the National Practitioner Data Bank. This variable is a reasonable substitute for year of Judgment or Settlement, which is an optional field, and frequently was not reported in the first few years of NPDB operation. Reports must be made to the Data Bank within 30 days of a payment, so in most cases this value represents the year the payment was made or the adverse action was taken.

WORKCTRY

Practitioner's Work Country. (Information for this item is recorded exactly as reported by the reporting entity. Therefore, this field may sometimes include erroneous data - i.e., numerical values, punctuation marks, etc.)

HOMESTAT

Practitioner's Home State.

>>>> See note to users at LICNSTAT variable.

Value Label (Same as WORKSTAT)

HOMECTRY

Practitioner's Home Country. (Information for this item is recorded exactly as reported by the reporting entity. Therefore, this field may sometimes include erroneous data such - i.e., numerical values, punctuation marks, etc.)

LICNSTAT

Practitioner's State of License (First Listed State of License -- practitioners may be licensed in more than one State. Up to 10 States of license may be reported to the NDPB. Only the first State listed in an NPDB report is provided in this file.)

Value Label (Same as WORKSTAT)

>>>> Note to users concerning State variables:

Researchers often want to assign reports to a State for analysis purposes. Licensure Actions might normally be assigned to a State on the basis of the practitioner's License State. Other actions and malpractice payments might best be assigned on the basis of the practitioner's work State. However, work State is not a required variable in reports; reporters must report either work State or home State. They may report both. About 86 percent of records contain work State information. About 34 percent contain home State

information. For non-licensure reports a commonly used method of assigning State is to create a State variable which equals work State if a work State value was reported and home State if no work State was reported. In SPSS, the following syntax would accomplish this:

```
STRING State (A2).

RECODE
workstat
(ELSE=Copy) INTO State.

EXECUTE.

DO IF (Workstat = " ").

RECODE
Homestat
(ELSE=Copy) INTO State.

END IF.

EXECUTE.
```

Note: In the DO IF (Workstat = " ") statement above, there are two spaces between the quotation marks.

LICNFELD

Practitioner's Field of License. [Note: Reporting is required for malpractice payments made for all practitioners regardless of their field of license.

Prior to implementation of Section 1921, the Public Use File collected reports required for adverse actions (other than exclusions) only for practitioners in license fields 10 through 35 (physicians and dentists). As of March 10, 2010 reporting of licensure adverse actions is collected for all practitioner types.]

IMPORTANT NOTE: Prior to March 10, 2010, adverse actions concerning practitioners in license fields other than 10 through 35 (physicians and dentists) were occasionally reported to the NPDB although these reports were not required. Since the implementation of Section 1921 licensure actions on all practitioner types have been required to be reported to the NPDB. However, statistical analysis of adverse clinical privileges or professional society action reports for practitioners other than physicians and dentists is not recommended since these reports are not required to be reported and may yield misleading results. Additionally, be aware that some professions have different names in different states and could yield inconclusive results from state to state. For example one state may name a practitioner a counselor, mental health (621) while another state may use the term professional counselor (651) even though the practitioners may provide the same service. Exclusion Actions (REPTYPE = 702), however, are reported for practitioners of all license fields and may be analyzed for all types of practitioners. Malpractice Payments (REPTYPE = 101 and 102) area also reported for practitioners of all license fields and may be analyzed for all types of practitioners.

ALGNNATR

Malpractice Allegation Group. This variable was first used in reports on 1/31/2004. For records with a RECTYPE value of "M", the value shown has been translated into the new Malpractice Payment Report codes from the act or omission codes used in old format reports. [This field is blank in Adverse Action records.]

IMPORTANT NOTE: When analyzing physician malpractice payments, ALGNNATR should not be used as a substitute for physician specialty. For example, surgery codes may be used to report payments for physicians who are not surgeons, and obstetrics codes may

be used to report payments for physicians who are not OB/GYNs, etc. The NPDB does not collect information on practitioner specialty in malpractice payment reports. No information on practitioner specialty is available for analysis.

May be blank if same as MALYEAR1

PAYMENT

Amount of Reported Payment. This is the amount of the specific payment that led to the filing of this malpractice payment report. Payment amounts are coded into ranges. All payments of \$100 or less are coded as \$50. Payments from \$101 to \$500 are coded as \$300. Payments from \$501 to \$1,000 are coded as \$750. Payments between \$1,001 and \$5,000 are coded as the midpoint of \$1,000 increments, e.g. payments between \$1,001 and \$2,000 are coded as \$1,500; payments between \$2,001 and \$3,000 are coded as \$2,500; etc. Payments between \$5,001 and \$100,000 are coded as the midpoint of \$5,000 increments, e.g., payments between \$30,001 and \$35,000 are coded as \$32,500, etc. Payments between \$100,001 and \$1,000,000 are coded as the midpoint of \$10,000 increments. Payments between \$1,000,001 and \$10,000,000 are coded as the midpoint of \$100,000 increments. Payments between \$10,000,001 and \$20,000,000 are coded as the midpoint of \$1,000,000 increments. Payments between \$20,000,001 and \$50,000,000 are coded as the midpoint of \$5,000,000 increments. Payments between \$50,000,000 and \$100,000,000 are coded as the midpoint of \$10,000,000 increments. Any payment of \$100,000,001 or more is coded as \$105,000,000. The grouping of payment amounts has the effect of slightly lowering the apparent mean and median payment amounts. For example, in the edition of the Public Use File created with data through March 31, 2004 the mean payment amount was \$187,474.87 and the median was \$72,500. The actual mean of the data that served as the basis for that edition of the file was \$189,821.03 and the actual median was \$75,000. When calculated for individual years or States, the means and medians in this file could vary slightly above or below the actual means or medians. We expect that similar relatively small differences exist for all editions of the file. Users needing exact means, medians, or other statistics may contact the Division of Practitioner Data Bank, which will provide the needed statistics if its workload permits. The exact payment amount for individual records will not be provided. [This field is blank in Adverse Action records.]

These amounts have *not* been adjusted for inflation. Users interested in adjusting for inflation may find additional information at http://www.bls.gov/cpi/home.htm, the web site maintained by the U.S. Department of Labor's Bureau of Labor Statistics (BLS). The BLS compiles the Consumer Price Indexes. We recommend using the "Consumer Price Index for All Urban Consumers (CPI-U) for the U.S. City Average for All Items, 1982-84=100" for inflation adjustment of malpractice payment amounts. The BLS also publishes CPI numbers specifically for medical care (prescription drugs and medical supplies, physicians' services, eyeglasses and eye care, hospital services, etc.); however, we recommend use of the broader CPI-U since malpractice payment amounts are based on many factors in addition to the cost of medical care.

Format: DOLLAR12 (with embedded \$ signs and commas; CSV format omits commas)

TOTALPMT

Total Payment by this Payer for This Practitioner. In most cases this will equal PAYMENT; however, if the reporting entity has made or will make other payments to this plaintiff for this practitioner in this case, this variable represents the total paid or to be paid. (Payment amounts are coded into ranges. All payments of \$100 or less are coded as \$50. Payments from \$101 to \$500 are coded as \$300. Payments from \$501 to \$1,000 are coded as \$750. Payments between \$1,001 and \$5,000 are coded as the midpoint of \$1,000 increments, e.g. payments between \$1,001 and \$2,000 are coded as \$1,500; payments between \$2,001 and \$3,000 are coded as \$2,500; etc. Payments between \$5,001 and \$100,000 are coded as the midpoint of \$5,000 increments, e.g., payments between \$30,001 and \$35,000 are coded as \$32,500, etc. Payments between \$100,001 and \$1,000,000 are coded as the midpoint of \$10,000 increments. Payments between \$1,000,001 and \$10,000,000 are coded as the midpoint of \$100,000 increments. Payments between \$10,000,001 and \$20,000,000 are coded as the midpoint of \$1,000,000 increments. Payments between \$20,000,001 and \$50,000,000 are coded as the midpoint of \$5,000,000 increments. Payments between \$50,000,000 and \$100,000,000 are coded as the midpoint of \$10,000,000 increments. This variable was first used in reports on 1/31/2004. [This field is blank in Adverse Action records and type "M" Malpractice Payment records.]

TOTALPMT values have *not* been adjusted for inflation. See the discussion of adjustment for inflation with the PAYMENT variable.

Format: DOLLAR12 (with embedded \$ signs and commas; CSV format omits commas)

PAYNUMBR

Single or Multiple Payment. (Malpractice settlements or judgments may be paid in one payment or in multiple payments. This variable specifies which is applicable to this record.) [This field is blank in Adverse Action records.]

| Value | Label |
|-------|-------------------|
| S | Single Payment |
| M | Multiple Payments |
| U | Unknown |

NUMBPRSN

Number of Practitioners Included in the Payment (Payments may be made which pertain to the acts or omissions of a number of practitioners. A separate report must be filed for each named practitioner.) [This field is blank in Adverse Action records.]

>>>> Note to users concerning NUMBPRSN:

NUMBPRSN is an indicator of the total number of practitioners involved in a case. The PAYMENT and TOTALPMT fields *should* refer to the amounts paid or to be paid for this specific practitioner regardless of the number of other practitioners involved. Other reports should specify the amounts paid for other practitioners. Dividing PAYMENT or TOTALPMT by NUMBPRSN does not generate a meaningful result.

PAYTYPE

Payment a Result of Judgment or Settlement. [This field is blank in Adverse Action records.]

| Value | Label |
|-------|--------------------------------------------------------------------------------------|
| В | Before Settlement (Applicable only to certain reports filed electronically in 1995 |
| | or later. See also "U" below. In other reports, it is impossible to distinguish from |
| | Data Bank information situations in which a payment is made before a formal |
| | settlement from instances in which the reporting entity does not specify whether |
| | the payment is a result of a settlement or a judgment. Most such instances are |
| | believed to be payments before settlement rather than true "unknowns." |
| J | Judgment |
| O | Other |
| S | Settlement |
| U | Unknown or Before Settlement [See note with "B"] |

>>>> Note to users concerning PAYTYPE:

We recommend that analysis of the PAYTYPE variable be done by considering all values except "J" to be settlements of one type or another.)

The following eleven variables are not contained in Data Bank reports but instead are calculated at the time the public use file is created. The values of the "NPxxxRPT" variables and ACCRRPTS variable will be the same in all reports for a given practitioner (i.e., all records with the same PRACTNUM value). The FUNDPYMT variable will have a value shown only for malpractice payment records.

PRACTNUM

Practitioner Number. (This number is assigned solely to each individual practitioner listed in this edition of the NPDB Public Use Data File. Its use allows researchers to link reports concerning the same practitioner. For example, if the fictional Dr. James Kildare had been reported for a malpractice payment, a clinical privileges action, and a state licensure action, the records for all three reports would list the same PRACTNUM in this file. PRACTNUM values are assigned during the creation of this file and are unique to this file. PRAACTNUM is not used by the National Practitioner Data Bank in any way. It is neither linked to nor derived from any practitioner identification numbers used by the National Practitioner Data Bank. Note also that although all records of a given practitioner will have the same PRACTNUM in this edition of the Public Use Data File, that same practitioner may have a different PRACTNUM in other editions of the Public Use Data Files prepared on different dates.)

ACCRRPTS

Subject's Number of Accreditation Reports. CAUTION: This variable counts the number of accreditation actions for the subjects in the full Public Use File. If you select a subset of the file (e.g., only reports from a particular State) this value may not reflect the subject's number of accreditation action reports in your selected subset. For example, if subject number 1545 has three accreditation action reports, two for Kansas accreditation actions and one for a Missouri accreditation action, a researcher who selected only Missouri accreditation action for analysis would have only one record for subject number 1545 in his or her Missouri data file, but that record would say the subject has three accreditation action reports, not one.

NPMALRPT

Subject's Number of Malpractice Payment Reports submitted under Title IV. CAUTION: This variable counts the number of malpractice payments for the practitioner in the full Public Use File. If you select a subset of the file (e.g., only reports from a particular State) this value may not reflect the practitioner's number of payment reports in your selected subset. For example, if practitioner number 1545 has three malpractice payment reports, two for Kansas payments and one for a Missouri payment, a researcher who selected only Missouri malpractice payments for analysis would have only one record for practitioner number 1545 in his or her Missouri data file, but that record would say the practitioner has three malpractice payment reports, not one.

NPLICRPT

Subject's Number of Licensure Reports submitted under Title IV and/or Section 1921. CAUTION: This variable counts the number of licensure actions for the practitioner in the full Public Use File. If you select a subset of the file (e.g., only reports from a particular State) this value may not reflect the practitioner's number of licensure action reports in your selected subset. For example, if practitioner number 1545 has three licensure action reports, two for Kansas licensure actions and one for a Missouri licensure action, a researcher who selected only Missouri licensure actions for analysis would have only one record for practitioner number 1545 in his or her Missouri data file, but that record would say the practitioner has three licensure action reports, not one.

NPCLPRPT

Subject's Number of Clinical Privileges or Panel Member Reports submitted under Title IV. CAUTION: This variable counts the number of clinical privileges or panel membership actions for the practitioner in the full Public Use File. If you select a subset of the file (e.g., only reports from a particular State) this value may not reflect the practitioner's number of clinical privileges or panel membership action reports in your selected subset. For example, if practitioner number 1545 has three clinical privileges or panel membership action reports, two for Kansas actions and one for a Missouri action, a researcher who selected only Missouri clinical privileges or panel membership actions for analysis would have only one record for practitioner number 1545 in his or her Missouri data file, but that record would say the practitioner has three clinical privileges or panel membership action reports, not one.

NPPSMRPT

Subject's Number of Professional Society Membership Reports submitted under Title IV. CAUTION: This variable counts the number of professional society membership action reports for the practitioner in the full Public Use File. If you select a subset of the file (e.g., only reports from a particular State) this value may not reflect the practitioner's number of professional society membership action reports in your selected subset. For example, if practitioner number 1545 has three professional society membership reports, two for Kansas actions and one for a Missouri action, a researcher who selected only Missouri professional society membership actions for analysis would have only one record for practitioner number 1545 in his or her Missouri data file, but that record would say the practitioner has three professional society membership action reports, not one.

NPDEARPT

Subject's Number of DEA Reports submitted under Title IV. CAUTION: This variable

counts the number of DEA actions for the practitioner in the full Public Use File. If you select a subset of the file (e.g., only reports from a particular State) this value may not reflect the practitioner's number of DEA action reports in your selected subset. For example, if practitioner number 1545 has three DEA action reports, two for DEA actions while the practitioner was practicing in Kansas and one for while the practitioner was practicing in Missouri, a researcher who selected only Missouri reports for analysis would have only one DEA action record for practitioner number 1545 in his or her Missouri data file, but that record would say the practitioner has three DEA action reports, not one.

NPEXCRPT

Subject's Number of Exclusion Reports submitted under Title IV and/or Section 1921. CAUTION: This variable counts the number of exclusion actions for the practitioner in the full Public Use File. If you select a subset of the file (e.g., only reports from a particular State) this value may not reflect the practitioner's number of exclusion action reports in your selected subset. For example, if practitioner number 1545 has three exclusion action reports, two for exclusion actions while the practitioner was practicing in Kansas and one for while the practitioner was practicing in Missouri, a researcher who selected only Missouri reports for analysis would have only one exclusion action record for practitioner number 1545 in his or her Missouri data file, but that record would say the practitioner has three exclusion action reports, not one.

NPGARPT

Subject's Number of Government Administrative Reports submitted under Section 1921. CAUTION: This variable counts the number of government administrative actions for the practitioner in the full Public Use File. If you select a subset of the file (e.g., only reports from a particular State) this value may not reflect the practitioner's number of government administrative action reports in your selected subset. For example, if practitioner number 1545 has three government administrative action reports, two for government administrative actions while the practitioner was practicing in Kansas and one for while the practitioner was practicing in Missouri, a researcher who selected only Missouri reports for analysis would have only one government administrative action record for practitioner number 1545 in his or her Missouri data file, but that record would say the practitioner has three government administrative action reports, not one.

NPCTMRPT

Subject's Number of Contract Termination Reports submitted under Section 1921. CAUTION: This variable counts the number of contract termination actions for the practitioner in the full Public Use File. If you select a subset of the file (e.g., only reports from a particular State) this value may not reflect the practitioner's number of contract termination action reports in your selected subset. For example, if practitioner number 1545 has three contract termination action reports, two for contract termination actions while the practitioner was practicing in Missouri, a researcher who selected only Missouri reports for analysis would have only one contract termination action record for practitioner number 1545 in his or her Missouri data file, but that record would say the practitioner has three contract termination action reports, not one.

FUNDPYMT

Malpractice Payment Made by a State Patient Compensation Fund, Excess Judgment Fund,

or Other Similar State Funds. (Nine States -- Florida, Indiana, Kansas, Louisiana, Nebraska, New Mexico, Pennsylvania, South Carolina, and Wisconsin -- have or had State funds which make malpractice payments in addition to the payment made by a practitioner's primary malpractice insurance carrier if the total amount of the settlement or judgment is more than a maximum amount set in State law for payments by a primary insurance carrier. If such payments are made, there are in most cases two reports to the NPDB, one from the primary malpractice insurance carrier and one from the State fund, for a single malpractice incident. [In some instances, however, a State fund may be the only payer.] Note that payments made by these funds have the effect of increasing the number of reports and decreasing the mean and median payment amounts in the affected States. Some of these funds have made payments for practitioners not practicing in the State of the fund at the time of the malpractice incident and some routinely make some payments for practitioners who are not covered by any primary carrier. New York has a malpractice carrier of last resort which sometimes is a practitioner's only carrier and sometimes provides only excess coverage. Payments by this New York carrier are NOT identified as state fund payments.) [This field is blank except for Malpractice Payment records.]
